## PROFILE

A studious and hardworking student looking to gain work experience and develop skills in computer science and programming.

## EXPERIENCE

### Career Education Council 2024 - 2025 iOS Developer (Remote)

- Developed an AI-powered video editing app, integrating innovative features for an enhanced user experience.
- Utilized Swift/Swift UI with XCode for frontend development and Python/JavaScript for backend implementation.
- Delivered a compelling pitch of the app to a diverse audience of students and industry professionals, showcasing its potential and key features.

### High School Math Tutoring 2024 - 2025 Tutor (Remote)

- Instructed high school students on advanced math concepts, tailoring lessons to meet individual learning needs and academic goals.
- Delivered weekly progress summaries to parents, highlighting key topics covered, student achievements, and outlining next steps for continued growth.

### Computer Science Club, Notre Dame C.S.S. 2024 - PRESENT Club President

- Teaches high school students advanced computer science concepts broken down into simpler topics for thorough comprehension.
- Hosts programming competitions for students to compete and challenge themselves to learn something new in computer science.

### St. Anthony of Padua Catholic Church 2021-2023 Church Assistant

- Processed sales transactions efficiently, handling cash, credit, and debit payments while ensuring accuracy and customer satisfaction.
- Managed inventory and merchandise, designing visually appealing displays to drive sales while tracking performance for auditing and restocking purposes.
- Supervised and engaged children in sporting and recreational activities, ensuring a safe, fun, and educational environment while promoting teamwork and physical development.
